Fire Protection Systems Inspection, Testing, and Maintenance Schedules

Emergency/Exit Lighting Testing and Inspection Schedule

NFPA 101 (*Life Safety Code*) set standards to ensure proper exit sign and emergency lighting placement, visibility, and performance in various settings.

- **Monthly:** Visual 30 second inspection. This can be done by the property owner by pressing the 'test' button on the unit.
- **Annually:** 90-minute load testing by qualified person.
- Emergency back-up batteries shall be replaced at intervals set by the manufacturer, or when light fails to continually illuminate for the full 90-minutes.

Your facility may have additional systems in need of certification by a fire protection company. Discuss your needs with your fire protection contractor or contact Canby Fire District for more information.
